Four useful tools

1) AEROSOL PURGING TOOL

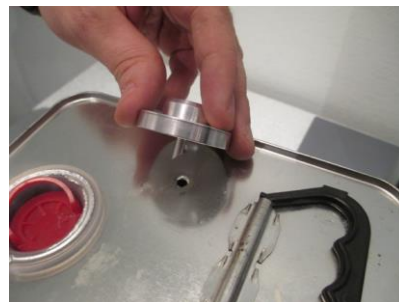

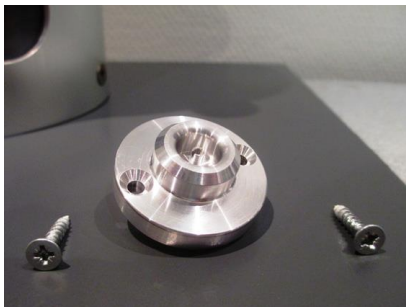

As you know it is important to shortly spray upside down after filling paint into the prefilled aerosol to remove paint residues in the valve which might lead to clogging.

The purging tool mounts with two screws on top of a paint can, which is used to collect the paint residue.

The purging tool can be mounted on any type of can: plastic or metal.
Clean the valve after filling in no time!

Steps

- Place the purging tool on top of the residue can.
- Press on the tool firmly to perforate the can.

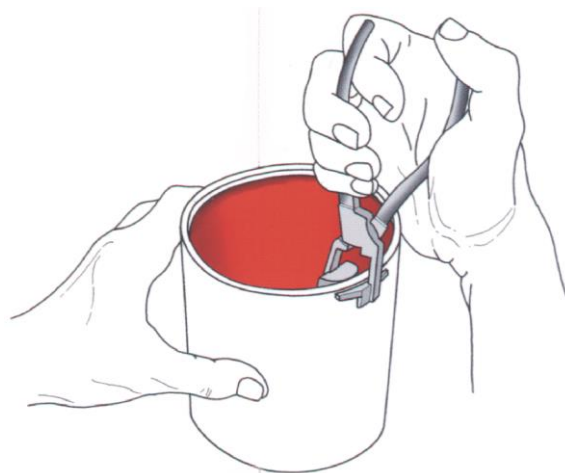

- Fix the purging tool in place on the can using the furnished screws.
- Vent the can to allow expanding gases to escape.

After filling, center the aerosol upside-down on the purge tool and press downward for 3 seconds until only gas escapes, then reinstall put the sprayhead on the aerosol can.

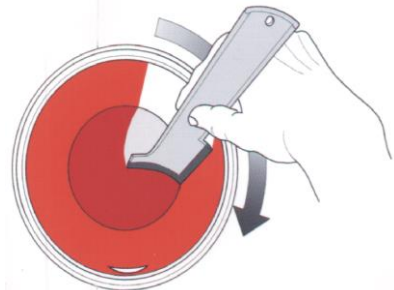

2) Pliers for better emptying of paint cans

3) Scraper for can emptying

4 sizes: for cans of 250ml, 700ml, 1 l and 3,75 l

reduce waste, rescue up to 30 g of paint per can!

4) Handle for ergonomic spraying
